2/5/78- a few comments by FBI tom No.

689,690 are on Ford-DeLoach contacts. There are others having to do with a party meeting. On still another Hoover referred to Ford as a "toad." I'd love that one. The papers would not use and pretended not to recall citation.

719, the "Louisiana situation"- can it be the Secret Service printing investigation? You may recall the FBI got the SS out of that fast. However, after LBJ gave the FBI the job there are records referring to SS as having jurisdiction.

745 - there is so little reference to the JFK assassination remaining I suspect the FBI excised some of that material, too.

757 - That Elden Rudd was an SA in Hally Logat, now Congressman. It was a Navy plane, he had pix and tape of intercept, was met at love Field a little after midnight by Heilman (Heitman?) HPO "red" subject expert.

760 - supposedly summary of LHO's military records makes no reference to any security clearances. 62- 109060- 1354

769 - background on Ferrie et al, omits that Ferrie was case defense investigator when Marcello beat deportation rap and was at the court with SA Regis Kennedy.

839 - I presume you know Mario Kohly-Morrow connection/CIA.

902 - of the records relating to me, perhaps these, the FBI knew before release that it had fabricated and released despite invocation of Privacy Act and JL's letter to AG. Under Act I was entitled to have correction disclosed with any corrected records. But they were not about to admit that the so-called annual celebration of the Russian Revolution (two months early yet) was a fabrication and they could not resist the temptation to defame. It was a Jewish Welfare Board picnic after the high holidays, for Wash area service personnel and families. I suggest this represents the real Gestapo/KGB, aka FBI.

918 - my copy not complete. Any hunch who the source is? Space does not fit name of Dallas Times-Herald editor who took up with FBI about them. Note that this was not leaked until after Sherklin's retirement was secure and that Hosty was not in any way disciplined for the destruction. Even allowed to talk to HSCA and Earl Golz.

942 - me on the Alan Burke Show, FBI's refusal to participate: Noble has always been in Lane's pocket. When the FBI would not provide opposition Noble turned to Lane and his publisher, who provided four lawyers, in apparent anticipation of ruining me and helping the Lane coming market. It worked the other way. I ruined them and it made quite a show.

950 - the finding of the bagged pistol in downtown Dallas: I got this in C.A. 78-0322. No follow-up investigation, at least not in files I got.
